PKI Disclosure Statement

Name: Timo Neumann, Arno Fiedler

Klassifizierung: public

Version: V1.1

1 Introduction

The proposed model PKI disclosure statement is for use as a supplemental instrument of disclosure and notice by a TSP. A PKI disclosure statement may assist a TSP to respond to regulatory requirements and concerns, particularly those related to consumer deployment. Further, the aim of the model PKI disclosure statement is to foster industry "self-regulation" and build consensus on those elements of a CP and/or CPS that require emphasis and disclosure.

Although CP and CPS documents are essential for describing and governing certificate policies and practices, many PKI users, especially consumers, find these documents difficult to understand. Consequently, there is a need for a supplemental and simplified instrument that can assist PKI users in making informed trust decisions. Consequently, a PKI disclosure statement is not intended to replace a CP or CPS.

The PDS is available under PDF/A format as specified in ISO 19005 parts 1 to 3
